

Knowledge & Learning

1. **Quiz / Test Scores** – Performance in Python/SQL/Big Data/other topic quizzes.
2. **Concept Understanding** – Ability to explain concepts clearly in discussions.
3. **Problem-Solving** – Accuracy and efficiency in solving coding/analytical problems.

Engagement & Participation

4. **Active Participation** – Asking questions, contributing to group discussions.
5. **Collaboration** – Helping peers, sharing knowledge in group activities.
6. **Consistency** – Regular attendance, timely completion of exercises.

Practical Application

7. **Project Work / Mini Assignments** – Quality, creativity, and correctness of project submissions.
8. **Real-world Thinking** – How well they apply concepts to solve realistic scenarios.
9. **Code Quality** – Clean, efficient, and well-documented coding style.

Soft Skills & Attitude

10. **Curiosity** – Showing initiative to explore beyond the syllabus.
11. **Communication Skills** – Explaining solutions clearly in presentations or demos.
12. **Adaptability** – Quick learning and ability to fix mistakes.
13. **Team Spirit** – Collaboration and positive contribution to team activities.

Fun / Extra Recognition (optional)

14. **Most Improved Trainee** – Growth from start to end of training.
15. **Fastest Debugger / Problem Solver** – Quick turnaround in exercises.
16. **Best Innovator** – Unique/creative solution in a project.
17. **Consistency Champion** – Never missed deadlines or tasks.

Best Practice:

- **Objective + subjective criteria** (e.g., quiz scores + team spirit).
- If possible, have **multiple small prizes**
 - Best Coder,
 - Best Team Player,
 - Most Improved
