

Basic Spark MCQs

- Apache Spark is primarily written in which programming language?
 - a) Java
 - b) Python
 - c) Scala
 - d) R

Answer: c) Scala

- Which programming languages are supported by Apache Spark?
 - a) Java, Python, and Scala
 - b) Java, Python, and C#
 - c) Java, PHP, and Scala
 - d) Java, Python, and Ruby

Answer: a) Java, Python, and Scala

- What is RDD in Spark?
 - a) Relational Database Data
 - b) Resilient Distributed Dataset
 - c) Random Data Dictionary
 - d) Registered Data Driver

Answer: b) Resilient Distributed Dataset

Intermediate Spark MCQs

- Which Spark module provides a programming interface for data structured as tables?
 - a) Spark Core
 - b) Spark SQL
 - c) MLlib
 - d) GraphX

Answer: b) Spark SQL

- What is the default persistence level for RDDs in Spark?
 - a) MEMORY_ONLY
 - b) MEMORY_AND_DISK
 - c) DISK_ONLY
 - d) NONE

Answer: a) MEMORY_ONLY

- Which of the following is not a Spark cluster manager?
 - a) Apache Mesos
 - b) Hadoop YARN
 - c) Kubernetes

d) Apache Kafka

Answer: d) Apache Kafka

Program-Related MCQs

- Which method is used to filter data in Spark DataFrame?

a) .select()
b) .filter()
c) .map()
d) .groupby()

Answer: b) .filter()

- How can you programmatically specify a schema for DataFrame?

a) Create RDD, create StructType schema, apply schema using createDataFrame
b) Read schema from JSON file
c) Use Cast operation
d) Convert RDD to list

Answer: a) Create RDD, create StructType schema, apply schema using createDataFrame

- Which PySpark library integrates Python with Apache Spark?

a) PyData
b) Py4j
c) NumPy
d) Pandas

Answer: b) Py4j

Sample Basic Questions

1. What is Apache Spark primarily used for?

a) Machine Learning
b) Big Data Processing
c) Word Processing
d) Web Hosting

Answer: b) Big Data Processing

2. The official language of Apache Spark is:

a) Python
b) R
c) Scala
d) Java

Answer: c) Scala

3. Which module provides SQL querying in Spark?

a) Spark Core

- b) Spark SQL
- c) Spark Streaming
- d) MLlib

Answer: b) Spark SQL

4. Which programming languages are supported by Spark?

- a) Java and Ruby
- b) Java, Python, and Scala
- c) Java and C#
- d) Java, Python, and Perl

Answer: b) Java, Python, and Scala

5. What is RDD?

- a) Relational Data Driver
- b) Resilient Distributed Dataset
- c) Random Data Distribution
- d) Registered Data Document

Answer: b) Resilient Distributed Dataset

Intermediate Level Spark MCQs (60 Questions)

- Focused on Spark architecture, advanced programming, optimizations, actions vs. transformations, MLlib, fault tolerance, streaming, resource management, and program-based questions.

Sample Intermediate Questions

61. Which method is used to cache an RDD in Spark?

- a) rdd.save()
- b) rdd.persist()
- c) rdd.cache()
- d) rdd.store()

Answer: c) rdd.cache()

62. What is the default persistence level in Spark?

- a) MEMORY_AND_DISK
- b) MEMORY_ONLY

- c) DISK_ONLY
- d) MEMORY_ONLY_SER

Answer: b) MEMORY_ONLY

63. Spark MLlib is designed for:

- a) Web Development
- b) Machine Learning
- c) ETL Operations
- d) Visualization

Answer: b) Machine Learning

64. Which of the following is NOT a Spark cluster manager?

- a) Apache Mesos
- b) Kubernetes
- c) Hadoop YARN
- d) Apache Kafka

Answer: d) Apache Kafka

65. How do you specify a custom schema for a DataFrame?

- a) Use StructType and createDataFrame
- b) Use DataFrameReader
- c) Use SQLContext
- d) Use schema inference

Answer: a) Use StructType and createDataFrame

66. What is a broadcast variable?

- a) Variable cached in memory
- b) Variable serialized and sent to all nodes
- c) Variable read from a file
- d) Variable used for logging

Answer: b) Variable serialized and sent to all nodes
